Subject: FW: SJRWP- USACE Evaluation of the Feasibility Study Remediation Alternatives- Final Report

Importance: High

David, Donn and Carlos,

Due to the importance of the remedial alternative discussion contained in that final USACE report, we asked that Parsons, a member of the Harris County Technical Team, review the report and comment on the aspects of the report that provides technical support for the full removal alternative with the use of BMP's. Parsons' report review comments are attached. While we understand there is no official EPA comment period for the final USACE Remedial Alternatives Evaluation Report, any consideration that you can give to the review comments is greatly appreciated. The document was forwarded to Gary Miller however due to the EPA's push to get the proposed remedy out for public comment and the upcoming Labor Day Holiday, I felt you should be copied directly as well.

I have also attached a copy of a letter sent to Regional Administrator Curry by the Official Public Health Officer for Harris County, Dr. Umair Shah, calling for full removal of the waste from the pits for public health reasons for your information and consideration in case you have not yet received it.

Thanks and have an enjoyable Labor Day weekend!

Rock Owens

Manager, Environmental Practice Group
Office of Harris County Attorney Vince Ryan
